12 MIL-6.5 (FACE/5.5 RELEASE LINER) SUREVIEW ONE WAY MESH

SureView One-Way Vision SA is a solvent ink, digital print media comprised of a white calendared vinyl face sheet and a black backside with clear repositionable adhesive and a release liner. The face sheet is 6.5 mil calendared vinyl, perforated, with a white face, glossy, and with a black backside. It has uniform 1.7 mm circular perforations spaced on a 60 degree bias and "weeded" from the face sheet matrix to give a 47% clear viewing area. The release liner is 5.5 mil, 120 gsm silicone treated paper, not perforated to prevent ink from jetting through the perforations and building up on the printer platen.
